YOON ME ME PHYO

Software Engineer | Full-Stack Developer

Kuala Lumpur, Malaysia | +60 1125636487 | yoonmemephyo.dev@gmail.com | GitHub: YoonMe105 | LinkedIn: https://www.linkedin.com/in/yoonmemephyo/

SUMMARY

Software Engineering diploma student at Asia Pacific University (APU), completing studies in November 2026 with a CGPA of 3.69. Full-stack developer building web applications with PHP, Laravel, Python, FastAPI, Django, React, and MySQL. Experienced across internship, industry, hackathon, and academic projects involving REST APIs, AWS cloud services, and AI-powered features. Passionate about designing maintainable software, solving real-world problems, and building clean, user-focused web applications.

WORK EXPERIENCE

Web Development & Research Intern | APCA@Asia Pacific University

August 2026 - Present

- Engineered player seeding and tournament draw generation in PHP and MySQL, cutting draw drafting time by 80%.
- Implemented and tested ranking-based seeding logic for 2 tournament formats.
- Created Super Admin, Organisation and Player portals with PHP, HTML, CSS, JavaScript and MySQL.
- Wrote PHP and Python validation scripts to cross-check 1,000+ file records against the database, reducing manual checking time by 98%.
- Refactored existing code to improve system performance.

System Engineer | CyberMissions Myanmar

Jan 2024 - May 2024

- Built an enterprise collaboration app with Flutter and Django, adopted company-wide by 50+ employees.
- Developed real-time group messaging and channels with a Django backend and Flutter frontend.
- Automated manual CMS content uploads, saving the content team 10 hours per week.
- Investigated and fixed production software defects, improving application stability and reducing user-reported issues.
- Supported deployment, production support and maintenance for an app with 50+ users across 3 releases

---

EDUCATION

Diploma in Information and Communication Technology with specialism in Software Engineering

Aug 2024 – Nov 2026

Asia Pacific University of Technology & Innovation, Kuala Lumpur, Malaysia

- Core studies in Software Engineering, Database Systems, Web Development, System Analysis & Design, Operating Systems, DevOps.
- CGPA: 3.69 / 4.00

Bachelor of Computer Science (studies paused in 4th year)

June 2016 – Feb 2020

University of Computer Studies, Mandalay, Myanmar

- Core studies in Database Design, Software Engineering, Web Development, and Embedded Systems.

SKILLS

- Frontend: HTML5, CSS3, React, Tailwind CSS, Bootstrap, Javascript
- Backend & Frameworks: PHP, Python, C#, C++, Java, FastAPI, Django, REST APIs
- Mobile: Flutter
- Databases: MySQL, MongoDB, PostgreSQL
- Cloud & Tools: AWS (Bedrock, Polly, S3), Git, GitHub

CERTIFICATIONS

AWS Certified Cloud Practitioner

Comprehensive training in cloud computing services, architecture, and deployment.

Meta Front-End Developer Professional Certificate

Focused on front-end development with HTML5, CSS, JavaScript, React, Bootstrap, Git/GitHub and UX/UI design in Figma.

ADDITIONAL INFORMATION

- Languages: Burmese (Native), English (Professional), Japanese(Intermediate), Chinese (Basic), Malay (Basic)
- Nationality: Myanmar
- Interests: Artificial Intelligence, Front-End Development, Full-Stack Development, Cloud Computing, Software Architecture, UI/UX Engineering.

Work Authorization: Requires visa sponsorship.

PROFESSIONAL PROJECTS

Tournament Software (Intern Project)
PHP, Python, MySQL, HTML, CSS, JavaScript

- Developed player seeding and tournament draw generation features for a tournament management system using PHP and MySQL, reducing draw drafting time by 80%.
- Implemented and tested ranking-based seeding logic for 2 tournament formats.
- Built the Tournament Super Admin, Organization and player website using PHP, Python, MySQL, HTML, CSS, and JavaScript.
- Built PHP and Python validation scripts to cross-check 1,000+ file records against the database, cutting manual checking time by 98%

GitHub: https://github.com/YoonMe105/Dynamic-Tournament-Draws

Slack Application (CyberMissions Myanmar)
Flutter, Django

- Developed a Flutter and Django collaboration platform with group communication and real-time messaging for 50+ users.
- Improved performance, scalability and content protection, reducing load time by 90%.

ACADEMIC & HACKATHON PROJECTS

Multilingual AI Avatar (Hackathon Project)
FastAPI, React, AWS Bedrock, Polly, S3

- Prototyped an AI-powered multilingual communication platform with real-time speech translation.
- Integrated 3 AWS services (Bedrock, Polly, and S3) for AI responses, speech synthesis, and cloud storage.
- Developed REST APIs using FastAPI and delivered a working prototype with a 3-person team under hackathon deadlines.

GitHub: https://github.com/YoonMe105/multilingual-avatar-backend | https://github.com/YoonMe105/multilingual-avatar

KitaKongsi (Hackathon Project)
Python

- Designed a blockchain-inspired food donation tracking system to improve donation transparency and traceability.
- Wrote Python modules for donation registration and tracking in a 4-person team

GitHub: https://github.com/YoonMe105/KitaKongsi

SmartLearn - E-Learning Platform (Final Year Project)
PHP, MySQL, JavaScript, HTML, CSS

- Co-developed a full-stack e-learning platform with a 6-member team, tested with around 20 users.
- Platform includes secure authentication, role-based access control, and analytics dashboards for users and admins.
- Owned the student side: course enrolment, personalised study plans and the responsive student dashboard.
- Introduced a badge and progress-tracking reward system to boost engagement.
